EXPERIENCE

Manager of Automation Development June 2004 to Present

Novell, Inc. Coordinated global automation efforts for all product lines of the Systems & Resource Management business unit. Managed HR resources as well as driving initiatives for the company. Assisted with adoption of Agile development practices. Initiated and managed opensource projects for automated testing tools. Acted as Scrum Master and later as a Product Owner for a Scrum (Agile) development team.

Software Engineer - ZENWorks Automation March 2003 - June 2004

Novell, Inc. Started developing with PHP, MySQL on Windows and Linux platforms. Created PHP/MySQL based Test Case Database to be used with Test Automation. Created Java Application and Web-based libraries through Mercury Winrunner TSL. Assisted in the management of customer critical situations.

Co-inventor & Team Manager February 2001 - March 2003

Novell, Inc. Participated in contextual inquiries in order to research possible new product lines for the Novell Portal Team. Co-invented the "Workspace" project with three other peers. Participated in product design. Managed the testing and automation teams for the project. Presented the product beta at trade show displays. Led efforts to fully automate the build process for the product. Helped design the product's beta program.

Manager - Test Automation Team November 1998 - February 2001

Novell, Inc. Managed automation development team for the Novell NetWare Client department. Designed and managed the production of tools to be used by various teams. Created java-based automation harness that was accessible through any web browser. Also managed the Novell SmartClient test team.

Contractor at Novell April 1997 - November 1998

Adecco, Inc. Wrote automation scripts in C++. Created customer utilities that shipped with the NDS for NT product line. Presented the product line at trade shows.
